MELBOURNE'S FOOTPATHS THROUGH A DAY

People an hour on each metre of footpath width, from the zones made in Plotlay. Pick an hour and a day type (5 pm on a weekday to start).

Hour: 17:00

Day: Weekday

People an hour per m of footpath width, hour picked

People an hour, all sensors, hour picked

67K

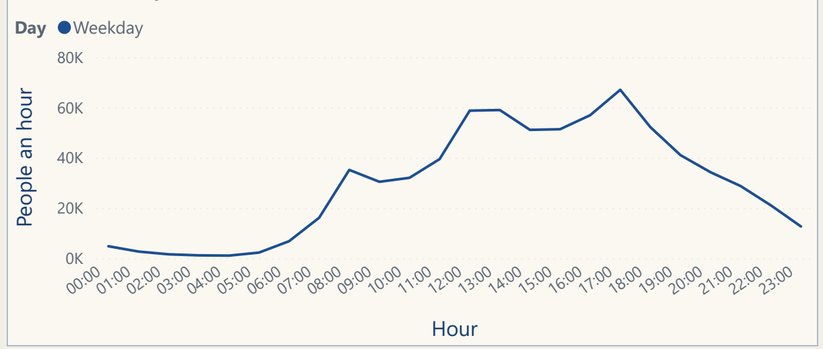

Median m² each, compared footpaths, hour picked

18.6

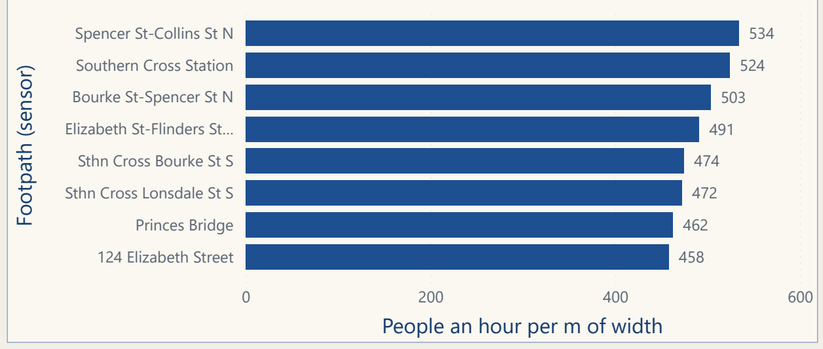

Median m² each at each footpath's busiest hour, day type picked

16.2

All sensors by hour

The 8 busiest compared footpaths for their width, hour picked

Pedestrian counts, sensor locations and footpaths: City of Melbourne Open Data, CC BY 4.0 (1 Nov 2025 to 31 Oct 2026). Footpath zones made in Plotlay (getplotlay.com) from the council footpaths. Space each is an estimate: walking at 1.2 m/s, averaged over the hour, the whole footpath width. Map context: ABS ASGS 2021 suburbs (C C BY 4.0), Vicmap Hydro (CC BY 4.0), City of Melbourne road corridors (CC BY 4.0).

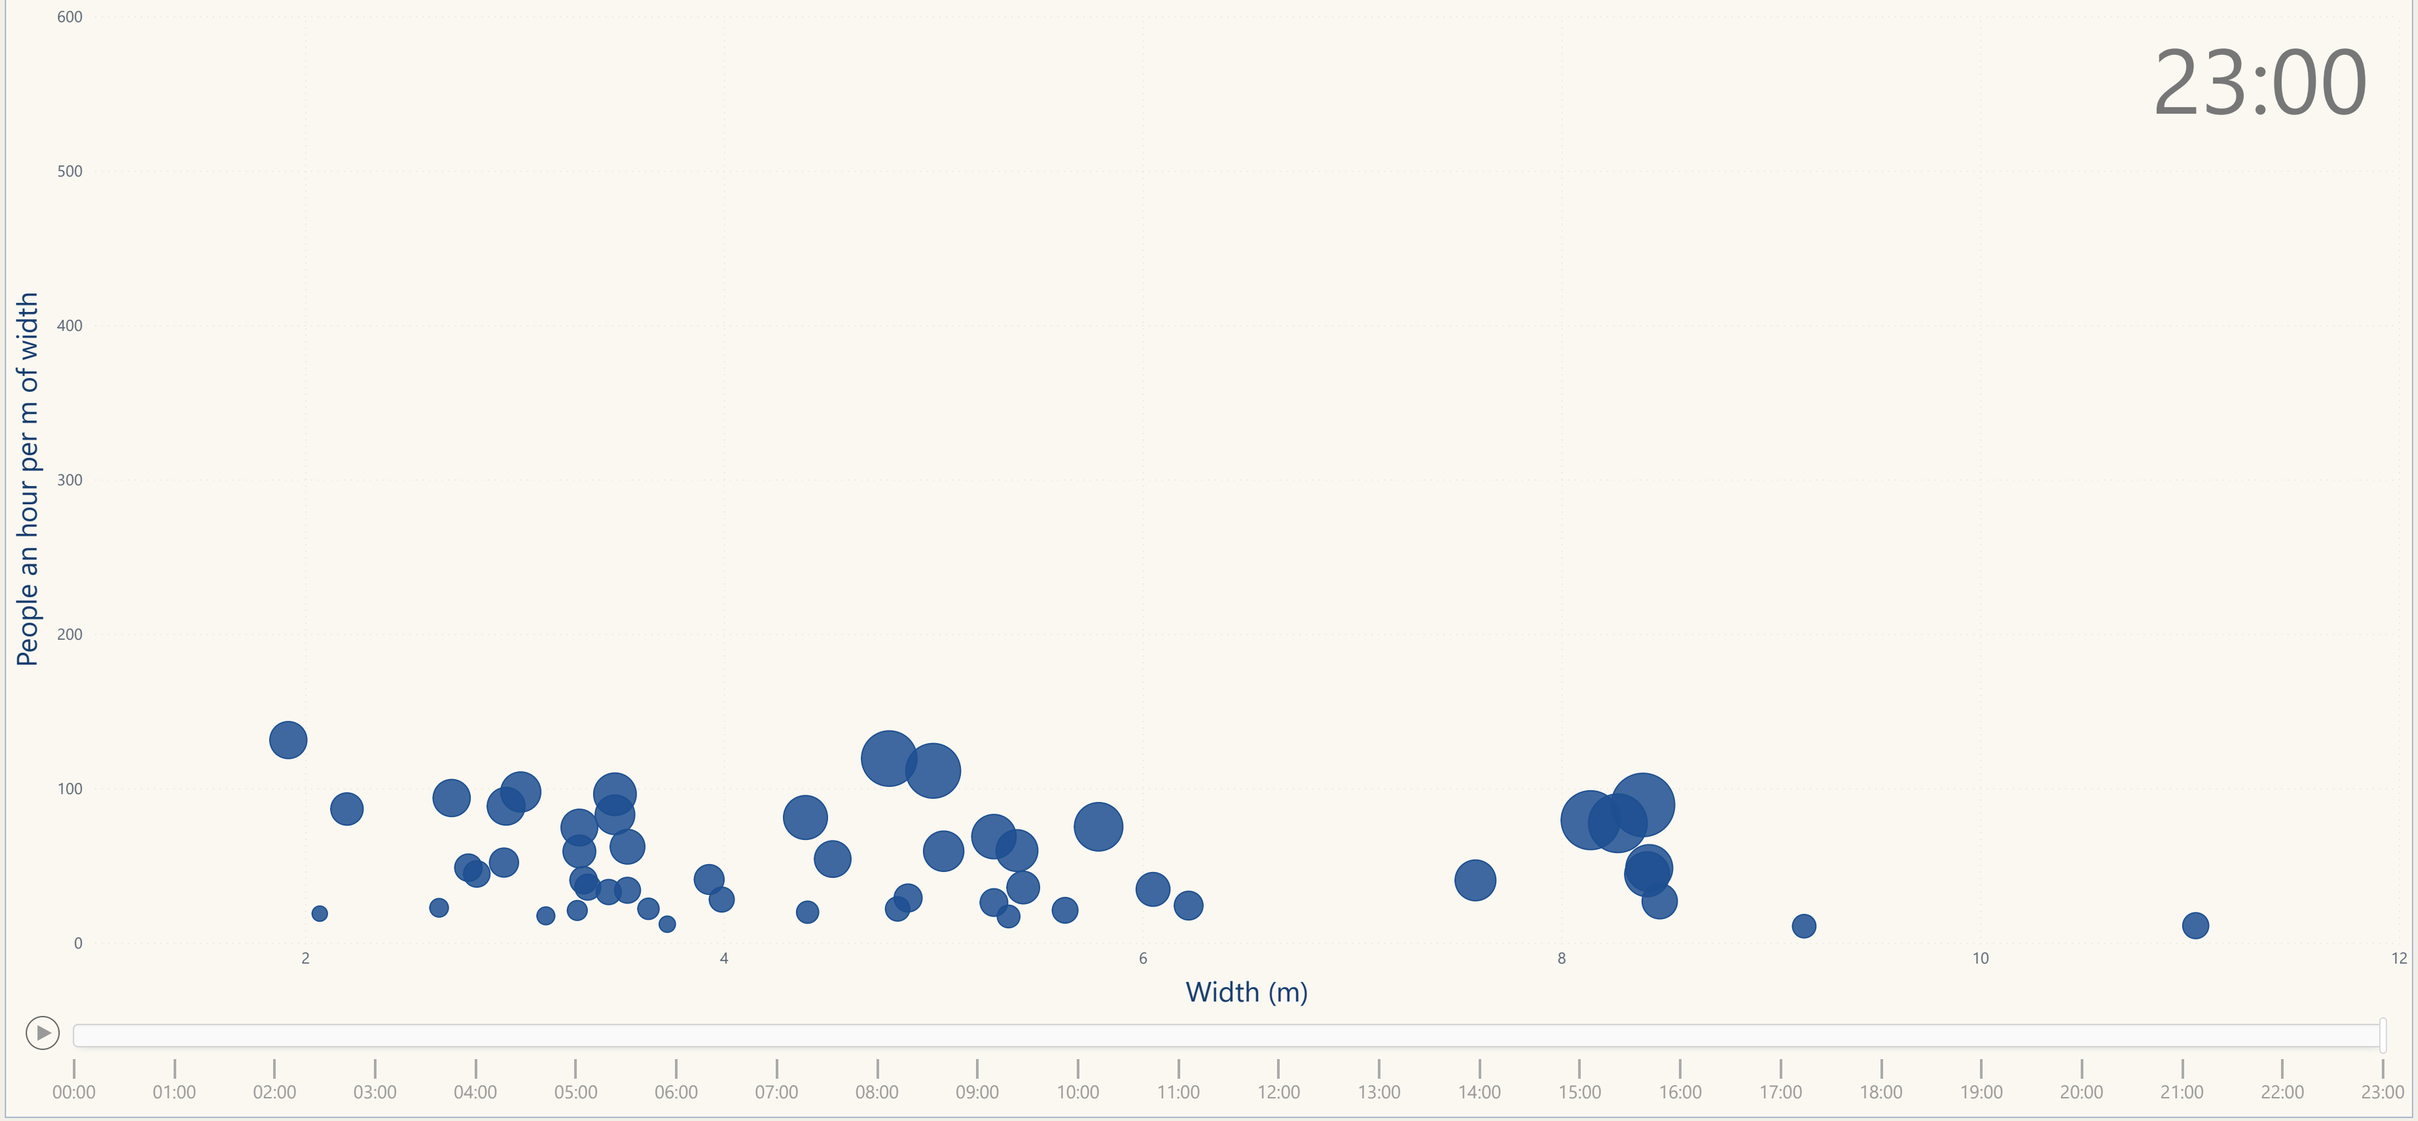

PLAY THE DAY

Press play under the chart: each footpath moves through the 24 hours. Across: width. Up: people an hour per metre. Size: people an hour.

THE BUSIEST DAYS

People counted each day, November 2025 to October 2026. Days when a sensor reported fewer than 24 hours count low (the hours reported are in the data).

People a day, all zoned sensors: the average day of each month

Sensors and their zones

Footpath (sensor)	Width (m)	Weekend ÷ weekday	m² each, busiest hour	Zone check	Note
114 Flinders Street Car Park Footpath	3.3	0.93	23.3	ok	
124 Elizabeth Street	4.5	1.05	8.1	ok	
155-161 Russell Street	6.1	1.23	24.7	ok	
163 King Street	3.3	1.06	22.0	ok	
197 Elizabeth Street	5.4	1.00	13.0	ok	
231 Bourke St	8.5	1.12	29.8	ok	
368 Elizabeth Street	4.8	1.08	9.8	ok	
61-67 Power Street Southbank	2.1	1.02	59.2	ok	
Awning of Nationwide Parking 474 Flinders Street	3.0	1.18	33.1	ok	
Bourke St - Spencer St (North)	3.5	0.83	8.6	ok

WHERE THE SENSORS ARE

Azure Maps: add the reference layer data/geometry/footpath_zones.geojson (Format visual, Reference layer) for the footpath outlines; it joins on the sensor code.
